A demonstration of the $\text{\LaTeX} 2_{\epsilon}$ class file for *Statistics in Medicine*[†]

Yalin. Zhu. Other*

This paper describes the use of the $\text{\LaTeX} 2_{\epsilon}$ `simauth.cls` class file for setting papers for *Statistics in Medicine*. Copyright © 2010 John Wiley & Sons, Ltd.

Keywords: class file; $\text{\LaTeX} 2_{\epsilon}$; *Statist. Med.*

1. Introduction

Many authors submitting to research journals use $\text{\LaTeX} 2_{\epsilon}$ to prepare their papers. This paper describes the `simauth.cls` class file which can be used to convert articles produced with other $\text{\LaTeX} 2_{\epsilon}$ class files into the correct form for publication in *Statistics in Medicine*.

The `simauth.cls` class file preserves much of the standard $\text{\LaTeX} 2_{\epsilon}$ interface so that any document which was produced using the standard $\text{\LaTeX} 2_{\epsilon}$ article style can easily be converted to work with the `simauth` style. However, the width of text and typesize will vary from that of `article.cls`; therefore, *line breaks will change* and it is likely that displayed mathematics and tabular material will need re-setting.

In the following sections we describe how to lay out your code to use `simauth.cls` to reproduce the typographical look of *Statistics in Medicine*. However, this paper is not a guide to using $\text{\LaTeX} 2_{\epsilon}$ and we would refer you to any of the many books available (see, for example, [1, 2, 3]).

2. The Three Golden Rules

Before we proceed, we would like to stress *three golden rules* that need to be followed to enable the most efficient use of your code at the typesetting stage:

- (i) keep your own macros to an absolute minimum;
- (ii) as \TeX is designed to make sensible spacing decisions by itself, do *not* use explicit horizontal or vertical spacing commands, except in a few accepted (mostly mathematical) situations, such as `\,` before a differential `d`, or `\quad` to separate an equation from its qualifier;
- (iii) follow the *Statistics in Medicine* reference style.

3. Getting Started

The `simauth` class file should run on any standard $\text{\LaTeX} 2_{\epsilon}$ installation. If any of the fonts, class files or packages it requires are missing from your installation, they can be found on the *TEX Collection* DVDs or from CTAN.

\maketitle

\section{Introduction}
.
.
.
```

Figure 1. Example header text.

Statistics in Medicine is published using Times fonts and this is achieved by using the `times` option as

```
\documentclass[times]{ctauth}.
```

Times fonts are also used for mathematics. This is achieved by adding the LaTeX package `mathtime`.

If for any reason you have a problem using Times you can easily resort to Computer Modern fonts by removing the `times` option.

4. The Article Header Information

The heading for any file using `simauth.cls` is shown in Figure 1.

4.1. Remarks

- (i) In `\runninghead` use '*et al.*' if there are three or more authors.
- (ii) Note the use of `\affil` and `\affilnum` to link names and addresses. The author for correspondence is marked by `\corrauth` and `\corraddr` is used to give that author's address, which will be printed as a footnote, prefaced by 'Correspondence to:'.
- (iii) For submitting a double-spaced manuscript, add `doublespace` as an option to the `documentclass` line.
- (iv) Use `\cgs` for giving details of financial sponsors. These details will be printed as a footnote, with 'Contract/grant sponsor:' inserted in the appropriate places.

```

\begin{table}
\caption{<Table caption>}
\centering
\begin{tabular}{<table alignment>}
\toprule
<column headings>\\
\midrule
<table entries
(separated by & as usual)>\\
<table entries>\\
.
.
.\\
\bottomrule
\end{tabular}
\end{table}

```

Figure 2. Example table layout.

- (v) The abstract should be capable of standing by itself, in the absence of the body of the article and of the bibliography. Therefore, it must not contain any reference citations.
- (vi) Keywords are separated by semicolons.

5. The Body of the Article

5.1. Mathematics

`simauth.cls` makes the full functionality of $\mathcal{A}\mathcal{M}\mathcal{S}\mathcal{T}\mathcal{E}\mathcal{X}$ available. We encourage the use of the `align`, `gather` and `multline` environments for displayed mathematics.

Use the LaTeX package `mathtime` to render mathematics in Times fonts. See sample below:

$$\ln(\mu) = \beta_0 + \sum_{i=1}^p \beta_i x_i + V_p + \tilde{P}_z \quad (1)$$

5.2. Figures and Tables

`simauth.cls` uses the `graphicx` package for handling figures.

Figures are called in as follows:

```

\begin{figure}
\centering
\includegraphics{<figure name>}
\caption{<Figure caption>}
\end{figure}

```

For further details on how to size figures, etc., with the `graphicx` package see, for example, [1] or [3]. If figures are available in an acceptable format (for example, .eps, .ps) they will be used but a printed version should always be provided.

The standard coding for a table is shown in Figure 2.

5.3. Cross-referencing

The use of the LaTeX cross-reference system for figures, tables, equations, etc., is encouraged (using `\ref{<name>}` and `\label{<name>}`).

5.4. Acknowledgements

An Acknowledgements section is started with `\ack` or `\acks` for *Acknowledgement* or *Acknowledgements*, respectively. It must be placed just before the References.

5.5. Bibliography

The normal commands for producing the reference list are:

```
\begin{thebibliography}{99}
\bibitem{<x-ref label>}
    <Reference details>
.
.
.
\end{thebibliography}
```

where `\bibitem{x-ref label}` corresponds to `\cite{x-ref label}` in the body of the article and `{99}` is the widest such number expected and determines the width of the number column in the reference list.

Please note that the file `wileyj.bst` is available from the same download page for those authors using `BIBTEX`.

5.6. Double Spacing

If you need to double space your document for submission please use the `doublespace` option as shown in the sample layout in Figure 1.

6. Support for `simauth.cls`

We offer on-line support to participating authors. Please contact us via e-mail at

simauth-cls@wiley.co.uk.

We would welcome any feedback, positive or otherwise, on your experiences of using `simauth.cls`.

7. Copyright Statement

Please be aware that the use of this $\text{\LaTeX 2}_{\epsilon}$ class file is governed by the following conditions.

7.1. Copyright

Copyright © 2010 John Wiley & Sons, Ltd, The Atrium, Southern Gate, Chichester, West Sussex, PO19 8SQ, UK. All rights reserved.

7.2. Rules of Use

This class file is made available for use by authors who wish to prepare an article for publication in *Statistics in Medicine* published by John Wiley & Sons, Ltd. The user may not exploit any part of the class file commercially.

This class file is provided on an *as is* basis, without warranties of any kind, either express or implied, including but not limited to warranties of title, or implied warranties of merchantability or fitness for a particular purpose. There will be no duty on the author[s] of the software or John Wiley & Sons, Ltd to correct any errors or defects in the software. Any statutory rights you may have remain unaffected by your acceptance of these rules of use.
